# Beirut

- **Role**: Fullstack Developer
- **Highlights**:
  - Built a fully responsive user interface using **React Native** and **Tailwind CSS**, ensuring seamless cross-device compatibility.
  - Architected a **MySQL** database, optimizing data flow through complex SQL queries and stored procedures.
  - Integrated an AI-powered assistant using **GPT-3.5 for NLP and Whisper for ASR**, with **FastAPI** and **Node.js**, enabling real-time, natural language interactions.
  - Implemented GitHub Actions to streamline testing and deployment, accelerating development and maintaining high code quality.
  - Created a **C4 model** and UML diagrams for the project, providing a clear representation of software layers and data flow.
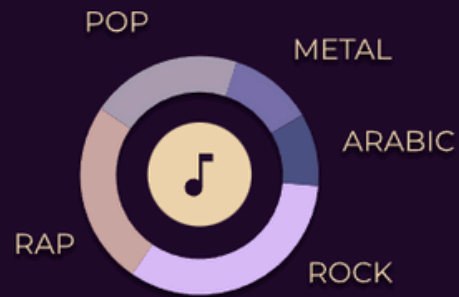

NightVentures

- **Role:** Frontend Developer & Backend Integration
- **Highlights:**
  - Designed a high-performance, visually engaging UI with **React** and **Tailwind CSS**, enhancing user engagement with optimized loading and animations.
  - Developed a backend interface in **Python** with an **SVC model** for personalized music recommendations, connected seamlessly with the frontend.
  - Utilized **Vercel** and **Render** for deployment, implementing serverless functions for scalable, on-demand data processing.
  - Ensured rapid loading times and smooth interactions, resulting in an engaging and efficient experience for users.
